Information Disclosure Statement

The information disclosure statement (IDS) submitted on February 21, 2002 was filed before the first Office Action. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 4 and 5 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. In claim 4, the Applicant is positively claiming part of a human body (e.g. a person's arm). The Office does not allow the claiming of body parts. Correction is required. The Examiner suggests the use of the word ---configured--- in order to clarify that the prosthetic device is attached to the patient's arm.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Line 2 is not understood. Do the digit tip pads rotatably move when they contact an object? Or they are fixed to the digits? Correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Mimura US Patent 5,062,673.

Mimura discloses a grip device comprising at least two opposable digits (1, 2 & 3), a drive linkage configured to enable the two opposable digits to grip (see entire linkages of Figs. 3, & 4, e.g. elements 34, 33, 32, 39 55, etc.), a digit tip pads 21 configured to rotatably connect a digit (see Figs. 3, 9a, 9b and col. 7, lines 10-13).

Regarding claim 2, line 2, the Examiner interpreted the digit pads as being fixed when they contact an object. The claims disclosed above are given their broadest reasonable interpretation. In re Pearson, 181 USPQ 641 (CCPA 1974). Finally, the Examiner has not given patentable weight to the phrase “configured to rotatably contact an object” until the Applicant clarify claim 2.

Allowable Subject Matter

Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
